Stanford University invites applications for a tenure-track or tenured position made possible in part by a gift from the Simons Foundation under the Math+X program, whose goal is to increase the interaction between mathematics and other disciplines in science and engineering.

We are seeking exceptional applicants who will develop a program of research and innovative new courses at the frontier of areas such as computational mathematics/statistics, imaging science, optimization or any other applicable field. This is a broad-area search. We will place higher priority on the impact, originality, and promise of the candidate’s work than on the particular sub-area of specialization. Evidence of the ability to pursue a program of innovative research and a strong commitment to graduate and undergraduate teaching are required. The successful candidate will teach courses at the graduate and undergraduate levels and build and lead a team of graduate students in PhD research.

Applicants will be considered for a joint appointment between either the Department of Mathematics or the Department of Statistics and another department of science or engineering, or the Institute for Computational and Mathematical Engineering.

Applicants should include a cover letter, curriculum vitae, list of publications, and a brief statement of research and teaching interests. Also, the candidate should arrange to have at least three letters of recommendation (junior candidates only); or names and addresses of three references (senior candidates only). Please apply and submit these materials through mathjobs.org; please check ?Math+X? as a job title. For additional information you may email jobs@math.stanford.edu with Math+X in the subject. Full consideration will be given to applications received before December 1, 2018. Applications received after this date will be accepted until the position is filled.

Stanford is an equal employment opportunity and affirmative action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, disability, protected veteran status, or any other characteristic protected by law. Stanford also welcomes applications from others who would bring additional dimensions to the University’s research, teaching and clinical missions.

PLEASE APPLY THROUGH MATHJOBS.ORG.

Alternatively, send your application to:
Math+X search
Department of Mathematics
450 Serra Mall, Bldg. 380
Stanford, CA 94305-2125

PLEASE! Do not duplicate your applications: use MATHJOBS.ORG (preferred) or regular mail, but not both. https://www.mathjobs.org/jobs/jobs/12220 [1]
